INVESTOR PRESENTATION
MARCH 2022

## FORWARD LOOKING STATEMENTS

The purpose of the presentation is to provide an update of the business of Medibio Limited (ASX:MEB). These slides have been prepared as a presentation aid only and the information they contain may require further explanation and/or clarification.

Accordingly, these slides and the information they contain should be read in conjunction with past and future announcements made by Medibio Limited and should not be relied upon as an independent source of information. Please contact Medibio Limited and/or refer to the Company's website for further information. The views expressed in this presentation contain information derived from publicly available sources that have not been independently verified.

None of Medibio Limited, or any of its affiliates or associated companies (or any of their officers, employees, contractors or agents (the Relevant Persons)) makes any representation or warranty as to the accuracy, completeness or reliability of the information, or the likelihood of fulfilment of any forward-looking statement or any outcomes expressed or implied in any forward-looking statements.

Any forward-looking statements in this presentation have been prepared on the basis of a number of assumptions which may prove incorrect and the current intentions, plans, expectations and beliefs about future events are subject to risks, uncertainties and other factors, many of which are outside Medibio Limited's control. Important factors that could cause actual results to differ materially from assumptions or expectations expressed or implied in this presentation include known and unknown risks.

Actual results could differ materially to the assumptions made and Medibio Limited's current intentions, plans, expectations and beliefs about the future. You are urged to view all forward looking statements contained in this presentation with caution. Except as required by applicable law or the ASX listing rules, the Relevant Persons disclaim any obligation or undertaking to publicly update any statements in this presentation, whether as a result of new information or future events.

This presentation should not be relied on as a recommendation or forecast by Medfbio Limited. This presentation does not constitute investment advice or should be construed as either an offer to sell, or a solicitation of an offer, to buy or sell shares in any jurisafiction.

## New US-based IR Firm Appointed

 RBMG.
## www,rbmilestone.com

Medibio Limited is pleased to announce that it has retained the United States based investor relations firm, RB Milestone Group LLC ("RBMG"), for an initial period of twelve months which started in February 2022. RBMG will be providing corporate communications advisory, non-deal roadshow advisory, market intelligence advisory, and business referrals to the management team of Medibio.

Medibio's Founder and Managing Director, Claude Solitario, stated:
"Medibio remains focused on advancing towards becoming one of the first companies with a regulated screening technology for mental health. RBMG has an excellent track record of targeting the right investor groups. We look forward to working with RBMG which will be leveraging its long-standing relationships to ensure that our narrative is communicated effectively to a US audience that is very receptive to mental health solutions, particularly considering the effects of COVID on mental health."

RBMG's Managing Director, Trevor Brucato, stated:
"We are very proud and protective of our track record with our clients globally. RBMG partners with companies that meet our criteria and appear to be set up for long-term success. My team and I look forward to working with the Medibio team and introducing the Company and its alisruptive screening technology for mental health to a wider audfence within the investment community throughout the United States."

## medibio

## Looking at Mental Health Objectively

Medibio is a mental health technology company pioneering the use of artificial intelligence, deep-learning algorithms and neural network methodology to identify biological markers and patterns to aid in early detection and screening of mental health conditions.

## THE PROBLEM

Current diagnostic tests rely on clinical interviews with subjective interpretation

## OUR SOLUTION

Identification of biomarkers and patterns based on the patient's own biological data to objectively aid in the early detection and screening of mental health conditions

## WHY INVEST IN MEDIBIO?

## FDA Program Underway

If successful, Medibio's solution will be one of the first objective depression screening technologies approved by the FDA

Validation trial underway for FDA De Novo Application

## Patent-Protected Innovative Technology

Screening technology for objectively assessing mental health state using overnight heart rate

## Targeting a Large Market

In 2019, national spending on mental health services totaled $\$ 225$ billion and accounted for 5.5\% of all health spending*

## Early Revenue Potential

Early revenue opportunnity in the non-clinical market with Medibio's LUCA and Ilumen mobile apps

## BUSINESS UNITS

Significant revenue potential in each market

CLINICAL

MEB001 Sleep Clinics

Primary care physicians and other specialists referring patients to sleep clinics for sleep disturbance and depression screening

MEB002
Homes
Depression Screening in Home Sleep Environment

NON-CLINICAL

FOR CONSUMERS
ilumen

FOR CORPORATES

The FDA, during the pre-submission meeting on 2 ${ }^{\text {nd }}$ February 2022 and subsequent discussions, has been very supportive of Medibio's objectives and complimentary of the Company's MEB-001 validation trial design.

The FDA has acknowledged that MEB-001 is novel and will likely pave the way for other research and products.

Medibio and the FDA are currently in communication to agree on end-points that remained outstanding within the 60 minutes allocated for the meeting.

In anticipation of agreement during the first half of CY22, Medibio has 17 sleep clinics in various stages of preparedness to launch the validation trial.

Medibio's vision is that everyone referred for a sleep study due to suspected primary or secondary sleep disorder will be screened for Major Depressive Episode using MEB-001.

MedBridge is the leading provider of sleep laboratory management services in the United States, operating 140 sleep disorder diagnostic centres.
"The objective identification of depression in patients that suffer certain sleep disorders is an unmet need and we are pleased to be working with Medibio to fasttrack patient recruitment in the validation trial."

- Chief Development Officer of MedBridge

## medibio

MEB-002
Depression Testing in the Home

More and more sleep studies are being performed in the patient's own home as opposed to in sleep clinics due to technological advancements, reduced cost and convenience.

In recognition of the growing patient cohort moving from in-clinic sleep studies to the home environment, planning has now begun for the development of MEB-002, which will screen for depression in patients undertaking a sleep study in the home environment.

MEB-002 algorithms will build on the success of MEB-001

## medibio

## CONSUMER HEALTH

## LUCA Mobile App

Biometric-driven stress monitoring with psychologistdeveloped tools to help users understand and track stress to avoid more serious conditions.

## PERCEIVED STRESS ASSESSMENT

A short series of questions to determine a user's level of perceived stress

ODYSSEY
Tools and exercises to confront negative thinking patterns and identify stressors

BIOMETRICS
Tracking three components of physiological stress: Cardiac (HR), Activity, and Sleep along with an Overall Stress score

## LUCA + NORTHERN MICHIGAN UNIVERSITY (NMU) TRIAL PARTNER

- Partnership: Medibio and The Department of Neuroscience at NMU
- Purpose: Raise awareness of the LUCA app prevention tool amongst the student body to potentially help students avoid getting into the red zone and/or taking more drastic options such as dialing 911
- Trial: Medibio will engage the student body through a call-to-action event with impactful head-line spokespersons.
- Based upon the success of this program, Medibio will look to scale this program across the US - a potential market of 20 million students and 4,000 schools and universities.

## Principal Investigators:

- Professor Adam Prus (Distinguished Professor \& Head of Psychological Science NMU)
- Professor Joshua Carlson
- Assistant Professor Dr. Lin Fang
- Medibio will collaborate with commercial partners and wearable device companies to participate in this worthwhile initiative.

## medibio

An early intervention software program providing objective data to manage and improve workforce mental health

## We CLOSE THE LOOP

for employers so they can measure and manage the mental well-being of their most important assets...their workforce

FOR EMPLOYEES
Assessments on mobile or desktop

## REVENUE MODELS

## ilumen

Corporate Health App

Enterprise license based on a corporation's total workforce
